## Built For The City, Nothing More

The FX Citi is purpose-built for Kathmandu's daily routes, office, market, and errands. Lightweight and nimble, it cuts through stop-start traffic effortlessly so the city never feels like a chore.

## Start Small. Upgrade When You're Ready.

Why pay for a range you don't need today? The FX Citi's customisable battery lets you start with what fits your budget and upgrade your range as your life demands more, no need to buy a new bike.

## Designed To Fit Anywhere You Go

Clean lines. No unnecessary aggression. The FX Citi's minimal urban aesthetic looks composed whether it's parked outside your office, a café, or the local market, a scooter you're always proud to be seen on.

## Light Enough To Never Ride You

Engineered specifically for urban stop-start riding, the FX Citi is light and responsive. You zip through traffic, slip into tight spots, and park with ease. The bike does the work, not you.

## Pay Only For What You Need

The FX Citi is a smart value for the smart commuter. No over-engineered specs for highways you'll never ride. Get exactly the scooter your daily life needs, and invest the rest where it actually matters.
